### **DETAILED ACTION**

Claims 1-26 are pending in the application.

#### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, 17 and 24, drawn to a method for diagnosing susceptibility to normal pregnancy, etc.

Group II, claim(s) 16, 17 and 19, drawn to a method of screening for agents which can be potentially used as diagnostic indicators.

Group III, claim(s) 18, drawn to a pharmaceutical composition comprising HLA-G and/or other compounds such as a peptide which binds HLA-G.

Group IV, claim(s) 20, drawn to a method for treating or preventing pre-eclampsia, etc.

Group V, claim(s) 21, 22, drawn to a method for improving pregnancy success.

Group VI, claim(s) 23, drawn to a kit comprising compounds useful diagnosing susceptibility to normal pregnancy, etc.

Group VII, claim(s) 25 and 26, drawn to a method for inducing tolerance or for treating an immune disease.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions are linked by HLA-G (the technical

Art Unit: 1635

feature). However, there is no special technical feature linking the claims because in order for a technical feature to be "special" it must be novel. HLA-G was known in the prior art, as evidenced by Lee et al. (see Immunity Vol. 3:591-600; 1995, cited in the application on page 3 lines 12-20, and page 44, line 13). Therefore, the technical feature is not novel and there is no special technical feature linking the claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
